DECLARATIVE VS IMPERATIVE PROGRAMMING

- **Declarative programming** is a programming paradigm — a style of building the structure and elements of computer programs—that expresses the logic of a computation without describing its control flow.
- Declarative programming is like describing the picture, where imperative programming is the instruction for painting that picture
- **Declarative** :
  - I want dinner with chicken.
- **Imperative**
  - **Go to the kitchen**
  - **Open fridge**
  - **Remove chicken from fridge**
  - **...**
  - **Bring food to the table**
