

FUNCTIONAL COMPONENTS

- Functional components are declared with a function that then returns some JSX.

- **EXAMPLE:-**

DRKREDRY

```
function Greeting(props) {  
  return <div>Hello,  
{props.name}!</div>;  
}
```

CLASS COMPONENTS

- Class-based components are declared using ES6 classes

```
class ParentComponent extends
React.Component {
  state = { color: 'green' };
  render() {
    return (
      <ChildComponent
color={this.state.color} />
    );
  }
}
```

FUNCTIONAL COMPONENTS

- Functional components are declared with a function that then returns some JSX.
- EXAMPLE:-

```
function Greeting(props) {  
  return <div>Hello,  
  {props.name}!</div>;  
}
```
