

DECLARATIVE IMPERATIVE PROGRAMMING

- **Declarative programming** is a programming paradigm — a style of building the structure and elements of computer programs—that expresses the logic of a computation without describing its control flow.
- Declarative programming is like describing the picture, where imperative programming is the instruction for painting that picture
- **Declarative :**
  - I want dinner **with** chicken.
- **Imperative**
  - **Go** to the kitchen
  - **Open** fridge
  - **Remove** chicken from fridge
  - ...
  - **Bring** food to the table
